

Domestic Abuse

1. Domestic Homicide. Research suggests that domestic abuse characterised by patterns of coercive control and / or stalking is more likely to end in homicide. Originating book:

Interviews

2. Interviews. Pre-planning both the questions and the topics to be addressed during an investigative interview improves the quality of interviews. Original document:

Cognitive Interview

3. Cognitive Interview. Research has shown that the Cognitive Interview is successful at increasing the quantity and quality of information from interviewees with 41% more correct detail recalled when compared to a control interview. Original, full article:
