

Knife Crime

1. Allocating resources to the highest-risk locations. Police analysts can map where the highest risks of a knife-enabled homicide are, based on the locations of non-fatal knife incidents. Open-access article: [Targeting Knife-Enabled Homicides for Preventive Policing: A Stratified Resource Allocation Model | SpringerLink](#)

Burglary

2. Main burglary deterrent. Burglars were asked what their main deterrent was when deciding which home to burgle, and it was believing the house was occupied. (Bennet & Wright, 1983; Cromwell et al., 1991; Maguire & Bennett, 1982; Repetto, 1974; Scarr, 1973; Waller & Okihiro, 1978; Walsh, 1980). <https://doi.org/10.1080/10683160500056945>

Crime Linkage / Suspect Prioritisation

3. Using an offender's MO. Modus Operandi behaviours are the behaviours necessary to commit the crime. Learning, confidence, and situation can all change an offender's MO, although it seems that successful MO behaviours are likely to remain consistent.
